

Frontend Dev.

We are currently on a lookout for a JavaScript expert, who has experience of building world-class apps using JS frameworks (Angular/Ember/Backbone preferred – but someone with strong JS fundamentals is also desired).

Key responsibilities

- Development of our application's front-end and our public websites.
- Take ownership of the code you write & features you build.
- Pioneer product ideas, participate in the design and implement them
- Strengthen and improve the architecture of our front-end.
- Strengthen and improve development and release processes within the team
- Collaborate with the team and communicate effectively

What we require

- Experience in developing front-end applications at scale.
- Strong knowledge and experience in HTML, CSS and JavaScript
- Experience of writing modular / reusable code and using JS frameworks like Ember, Angular, Backbone.js, etc., especially about their internal working.
- Excellent analytical and problem solving skills
- Knowledge of high-level programming concepts like promises, data-binding.
- Experience with SASS, Grunt, Selenium is a plus.
- Knowledge of Javascript design patterns is a plus.

What you get at Grofers

- Competitive salary and equity, based on experience
- Laptop and peripherals of your choice
- Working with a kick-ass team that is passionate about making shopping easier for lazy folks like ourselves

About Grofers

Grofers is a hyper-local delivery platform. We are building a delivery marketplace that connects consumers with local merchants for express deliveries. We are currently present in Delhi NCR and Mumbai.

Grofers started in January 2014 and currently employs over 80 people. The company is backed by Sequoia Capital.
