Android Dev.

Grofers is looking for someone to own our Android app. This means leading the entire development process so that shopping from local stores through the app is a seamless experience.

Some basic requirements for the role-
- Great work ethic
- They should know Java + Android SDK and have at least one year experience with Android development

What you get at Grofers
- Competitive salary and equity, based on experience
- Laptop and peripherals of your choice
- Working with a kick-ass team that is passionate about making shopping easier for lazy folks like ourselves

About Grofers

Grofers is a hyper-local delivery platform. We are building a delivery marketplace that connects consumers with local merchants for express deliveries. We are currently present in Delhi NCR and Mumbai.

Grofers started in January 2014 and currently employees over 80 people. The company is backed up Sequoia Capital.
